

Your Hotel Online — from website to a system that runs the property

This short document is here to help us agree on **exactly what you need**, and in what order. You don't need to know the technology — just tell us how your hotel actually works today and where it hurts. **Tick the boxes, write in the blanks, and send it back.** We'll turn your answers into a clear proposal, a timeline and a fixed price.

Prepared by: Simboni Misiati Peter (SMP) — SMP Developers · **Portfolio:** smp-developers.com

How to read this. A hotel system is usually built in stages, not all at once — you get value early and spread the cost. Section 6 lays out those stages. Everything before it simply helps us work out which stage you should start at. **If you're unsure about an answer, leave it blank or write "not sure"** — that's useful information too, and we'll advise.

1 About your property

Hotel / property name and location

What best describes you?

☐ Hotel ☐ Resort ☐ Lodge ☐ Guest house ☐ Serviced apartments ☐ Airbnb / villas

How many rooms, and how many room types?

Rooms: ☐ 1-10 ☐ 11-30 ☐ 31-60 ☐ 60+ Room types (single, double, suite...): _____

Do you have more than one property or branch?

☐ One only ☐ Two or more — how many? _____ ☐ Planning to expand

Besides rooms, what else do you run?

☐ Restaurant ☐ Bar ☐ Conference / events ☐ Pool / spa ☐ Tours ☐ Other: _____

2 How guests book you today

This tells us how much money is currently leaking to middlemen.

Where do most bookings come from?

☐ Phone call ☐ WhatsApp ☐ Walk-in ☐ Booking.com / Expedia ☐ Airbnb ☐ Agents ☐ Our website

Roughly what % of bookings come through online travel agents (Booking.com etc.), and what commission do they take?

Share: _____% Commission: _____%

Do you currently have a website?

☐ No ☐ Yes, but outdated ☐ Yes — address: _____

Can guests pay you online right now?

☐ No, cash / on arrival ☐ M-Pesa till or paybill ☐ Bank transfer ☐ Card

3 How you run the property today

Be honest here — “a book at reception” is a perfectly normal answer, and it’s where most hotels start.

HOW DO YOU CURRENTLY HANDLE...	PAPER / BOOK	EXCEL	A SYSTEM WE BOUGHT	NOT AT ALL
Reservations & the room diary	☐	☐	☐	☐
Check-in / check-out & guest register	☐	☐	☐	☐
Guest bills & receipts / invoices	☐	☐	☐	☐
Restaurant & bar orders (POS)	☐	☐	☐	☐
Stock — kitchen, bar, housekeeping	☐	☐	☐	☐
Housekeeping & room status	☐	☐	☐	☐
Staff, shifts & who did what	☐	☐	☐	☐
Daily takings & reports for the owner	☐	☐	☐	☐

4 What hurts most right now?

Tick everything that sounds like your hotel. This is the single most useful section — it decides what we build first.

- ☐ Guests can’t find us online ☐ We lose too much to OTA commission ☐ Double bookings
☐ We don’t know our true daily income ☐ Stock / stores go missing ☐ Bar & kitchen sales don’t reconcile
☐ No proper receipts or invoices ☐ Can’t see the business when away
☐ Too much paperwork at reception
☐ Corporate clients want invoices & credit ☐ KRA / eTIMS compliance ☐ Staff accountability

If we could fix only ONE thing in the next three months, what should it be?

5 The website itself

What must the website do for you? (tick all)

- ☐ Look credible & show the property ☐ Photo gallery ☐ Show rooms & live rates
☐ Take direct bookings ☐ Take deposits / full payment online ☐ Conference & events enquiries
☐ Restaurant menu ☐ Reviews & testimonials ☐ Blog / offers & packages
☐ Multi-language ☐ WhatsApp enquiry button ☐ We update content ourselves

Do you have professional photos of the property?

- ☐ Yes, good ones ☐ Some, need more ☐ No — we’d need a shoot

Do you own your domain name (e.g. yourhotel.co.ke)?

- ☐ Yes: _____ ☐ No — please register one for us

Any hotel websites you like the look of? (a link or two really helps)

6 How we'd build it — in stages

*You don't have to decide the whole system now. Each stage stands on its own and pays for itself before the next one starts. **Tick where you'd like to begin.***

STAGE 1 BE FOUND & BE TRUSTED

A professional hotel website — rooms, photos, location, contact, WhatsApp enquiries and an enquiry form. Fast, mobile-first, and built so booking can be switched on later without a rebuild.

☐ **Start here**

STAGE 2 TAKE DIRECT BOOKINGS

Live availability, online booking and payment (M-Pesa and/or card), automatic confirmation emails, and a simple reservations calendar for reception. This is the stage that starts cutting OTA commission.

☐ **Include this**

STAGE 3 RUN THE FRONT DESK

Property management: room diary, check-in / check-out, guest register and history, folio & guest billing, receipts and invoices, housekeeping room status, and daily reports for the owner.

☐ **Include this**

STAGE 4 RESTAURANT, BAR & STORES

Point of sale and stock: table & room-charge orders, kitchen/bar tickets, printed receipts, stock control for kitchen, bar and housekeeping, supplier purchases, wastage and stocktakes.

☐ **Include this**

STAGE 5 CONTROL & GROW

The owner's layer: revenue & occupancy dashboards you can see from anywhere, staff roles and permissions, an activity log of who did what, corporate accounts & credit, KRA / eTIMS-ready invoicing, channel sync with Booking.com, and multi-property support.

☐ **Include this**

7 Practicalities

When would you like to go live?

☐ As soon as possible ☐ 1-2 months ☐ 3-6 months ☐ Just exploring for now

Do you have a budget range in mind?

☐ Website only (smaller) ☐ Website + booking ☐ Full system, phased ☐ Prefer you advise us

At the property, is there...

Reliable internet? ☐ Yes ☐ Sometimes ☐ No Computers/tablets at reception? ☐ Yes ☐ No

A receipt printer? ☐ Yes ☐ No

Who will we work with day to day, and who signs off decisions?

Anything else we should know about how your hotel works?

8 Who you'd be working with

I'm **Simboni Misiati Peter (SMP)** — a software engineer and tech consultant with an **MSc in Software Engineering**, 10+ years' experience and 100+ delivered projects. I build both sides of a business: the website guests see, and the system your staff run. Recent, relevant work:

Zuri Hotels & Resorts — hospitality website & enquiry funnel

Four properties across Kenya & Uganda ·
zuriplaceresort.com

64 Theatre — ticketing with M-Pesa checkout
Online sales, signed QR tickets, offline gate scanning

StackUp — multi-tenant SaaS product
Secure, role-based, web & mobile · stackup.co.ke

Riziki Industrial Chemicals — website + full POS & stock system

Sales, stock ledger, batches, credit, reports ·
rizikichemicals.co.ke

TallyPay — billing & payments platform
Quote → invoice → receipt, M-Pesa collection ·
tallypay.co.ke

Fit Generations — membership & classes site
Timetable and join/enquiry journeys ·
fitgenerationsgym.com

See the full portfolio and case studies at smp-developers.com.

What happens next. Send this back — photographed, scanned or filled in on your phone — and within **three working days** you'll receive a written proposal with a recommended starting stage, a timeline, a fixed price and exactly what's included. There's no cost or obligation for this step.
