

Simboni Misiati Peter

Full-Stack Developer — Interactive Web Products & SaaS

Portfolio: smp-developers.com · **Code:** github.com/simboni · **Email:** info@smp-developers.com · **Phone / WhatsApp:** +254 706 289 514
Location: Nairobi, Kenya (remote, EAT / UTC+3 — daily overlap with EU & US-East) · **English:** Professional working proficiency (C1)

PROFILE

Full-stack engineer with **10+ years’ experience and 100+ delivered projects**, specialising in **interactive, multi-tenant web products** — not brochure sites. I design and build complete systems end to end: typed React/Next.js front-ends over NestJS, Laravel and Node APIs, on PostgreSQL, with authentication, payments, real-time state and admin tooling. My work is security-first (database-enforced tenant isolation, signed tokens, audit logs, CI gates) and correctness-first (integer-cents accounting, double-entry ledgers, unit tests). I hold an **MSc in Software Engineering** and ship independently from architecture through deployment.

TECHNICAL SKILLS

Frontend	React 19, Next.js 15/16 (App Router, Server Actions, SSG), TypeScript, Tailwind CSS v4, Livewire, responsive UI & state management
Backend & APIs	NestJS, Node.js, Laravel 12 / PHP 8.4, Python / Django, REST APIs, raw SQL, server actions, cron & background jobs
Databases	PostgreSQL 16 (Row-Level Security, migrations), MySQL, SQLite / Cloudflare D1, Supabase, Redis, Drizzle ORM
Auth & security	Argon2id hashing, JWT (two-stage, workspace-scoped), rotating refresh tokens, better-auth, RBAC, append-only audit logs, encryption at rest
Payments	M-Pesa Daraja STK Push, Kopo Kopo, subscriptions & auto-receipting, double-entry ledgers, VAT/tax logic
Architecture	Multi-tenant SaaS, modular monoliths, monorepos (pnpm, shared types), PWAs, offline-first sync, event/audit trails
Testing & CI	Unit-tested domain logic, CI pipelines with security gates (cross-tenant isolation asserted on every push), Git & GitHub
Cloud & DevOps	Fly.io, Cloudflare Workers/Pages, Vercel, Railway, Render, Docker, Caddy
Mobile	Capacitor (Android/iOS shells sharing one typed contract with web & API)

SELECTED PRODUCTS & SYSTEMS

StackUp — multi-tenant work-management SaaS (own product) · stackup.co.ke · github.com/simboni/smp-planning
Next.js 11 · PostgreSQL 16 · Next.js 15 · React 19 · TypeScript · Capacitor · Fly.io

- Architected an open, self-hostable ClickUp alternative: Workspaces → Spaces → Folders → Lists → Tasks, with List/Board/Calendar/Gantt views, Docs, Goals, Dashboards, Time Tracking and Automations.
- **Security-first multi-tenancy:** fail-closed PostgreSQL Row-Level Security — the app role is NOBYPASSRLS, every workspace table FORCES RLS, and missing workspace context denies every query.
- Argon2id passwords, two-stage JWTs (identity → workspace-scoped access), rotating refresh tokens and an append-only audit log; a **CI gate asserts cross-workspace isolation on every push**.
- One pnpm monorepo with shared types serving three clients: REST API, web app and Capacitor Android build.

TallyPay — multi-tenant billing & payments SaaS · tallypay.co.ke
Next.js 16 (Server Actions) · Cloudflare Workers/D1 · Drizzle ORM · better-auth · M-Pesa

- Built the full money cycle — quotation → invoice (deposit, balance, 16% VAT) → receipt — with isolated per-business workspaces, a free/Pro white-label split and a cross-tenant admin console.
- **Correct-by-design accounting:** money as integer KES cents and VAT in basis points, unit-tested; every query scoped by *requireOrg()*.
- M-Pesa STK Push collection with automatic receipting and per-vendor credentials encrypted at rest; A4 PDF share links via Cloudflare Browser Rendering and transactional email.

64 Theatre — production ticketing platform with offline gate scanning

Laravel 12 · PHP 8.4 · PostgreSQL 16 · Redis 7 · Livewire · Filament · M-Pesa Daraja

- Designed a modular Laravel monolith for online ticket sales: public event pages, M-Pesa STK checkout, SMS/email delivery and a Filament admin.
- **Offline-first gate scanner:** HMAC-signed QR tickets verify without internet; database constraints guarantee each ticket redeems exactly once.
- Double-entry money ledger recording every sale for reconciliation.

Naveedex — trading-journal SaaS · [naveedex.com](#)

Next.js · React · TypeScript · Supabase (auth + PostgreSQL) · Vercel

- Complete SaaS: authentication, subscription payments (Kopo Kopo), admin panel, scheduled cron jobs and a knowledge base.
- Strategy/setup library with performance analytics, one-click PDF & Excel export (jsPDF, xlsx) and shareable image trade-cards.

Zuri Hotels & Resorts · [zuriplaceresort.com](#) | HTML/CSS/JS · Docker · Caddy · Railway · **Fit Generations** ·

[fitgenerationsgym.com](#) | Next.js 16

- Client web builds with containerised deployment and booking/enquiry funnels — further live work at smp-developers.com.

EXPERIENCE

Full-Stack Developer — Freelance & Contract

2015 – Present

Independent — clients across Kenya & remote

- Delivered 100+ projects for 20+ clients — SaaS products, fintech and payment systems, ERP and microfinance platforms, ticketing, e-learning tools and web applications.
- Own the entire lifecycle solo: requirements and data modelling, API and schema design, UI implementation, testing, deployment, monitoring and handover.
- Integrate third-party systems end to end — mobile money (M-Pesa Daraja, Kopo Kopo), SMS gateways, transactional email, PDF generation and scheduled jobs.

Founder & Senior Developer

2023 – Present

SMP Developers — Nairobi, Kenya

- Lead architecture and development of web platforms, systems and mobile apps; coordinate collaborators and review code to keep quality and delivery on schedule.
- Building StackUp as an in-house SaaS product alongside client engagements.

Chairman & Director

2015 – Present

SMP Eventures Ltd — Kenya

- Lead a multi-disciplinary team turning client and internal product ideas into delivered software.

EDUCATION & CERTIFICATION

MSc, Software Engineering

Jomo Kenyatta University of Agriculture & Technology (JKUAT) · 2023 – 2025

Programming Certificate — Software & App Development

JKUAT · Git, JavaScript, iOS, Android, PHP, Laravel, Python, Django · 2024 – Present

WordPress Development — Certification & Practice

Custom themes, Elementor, DIVI, Gutenberg · 2015 – 2025

Languages

English — professional working proficiency (C1) · Swahili — native

AVAILABILITY

Open to part-time freelance work, 10-20 hours per week, fully remote. Based in Nairobi (EAT / UTC+3) with reliable high-speed internet and a full working-day overlap with Europe and US-East mornings. Comfortable owning features end to end from a written brief with minimal supervision.
